All,

- Hope you enjoyed the Thanksgiving Day Holiday! November has been a vey busy month for new features and enhancements for the TTS Platform. Our latest is worthy of its own email announcement. We have developed a Microsoft Outlook Addin that takes advantage of your companies TTS Platform data within your MS Outlook application.

This feature will allow you to view Quotation Activity of an individual while viewing an email from that person within MS Outlook. You can also use your TTS Platform Contacts to create individual emails or send mass emails based on your TTS Email List or TTS Customer Types. Please review this link (installation instructons) to learn how to install the MS Outlook Addin from the Microsoft AppSource. Once installed clck on this link (usage instructions) for usage instructions.

Contact our team for assistance. https://www.tradetechsolutions.com/TTSAboutUs.html

If you use GMail and not Outlook we will have a similar addon for GMail coming soon.

Thank You for being a TTS Customer and if not please call to become one today.

Matthew Scarborough
