

THE TTS CONNECTION

We have been busy at TTS updating and enhancing our program to make it the most comprehensive, easy to use Sale's Rep "ERP" out there. We always encourage and appreciate our customers feedback. We have a few updates to share with you this month.

Software Update

You asked for it and we listened!

As you may have already noticed, we made an enhancement to the "Check Inventory" section in the Total Order Entry Module. You can now include customer pricing by simply selecting a customer in the left option panel. You will then see pricing based on the pricing structure that you have already set up.

In the image below you will see:

Yellow - indicates a special price

White - is the calculated price

Gray - is the base price

If you need any assistance in setting this up, please [contact one of our team members.](#)

New dashboard JUST RELEASED

When you log in to your TTS platform you will now notice your most important information is displayed in simple to read charts and graphs. The data displayed is from the most recent 6 months. This makes it simple to analyze the state of your business in once glance.

With the click of a button you can change the display from a pie to a bar chart and the report data from a win/loss or a quotation report.

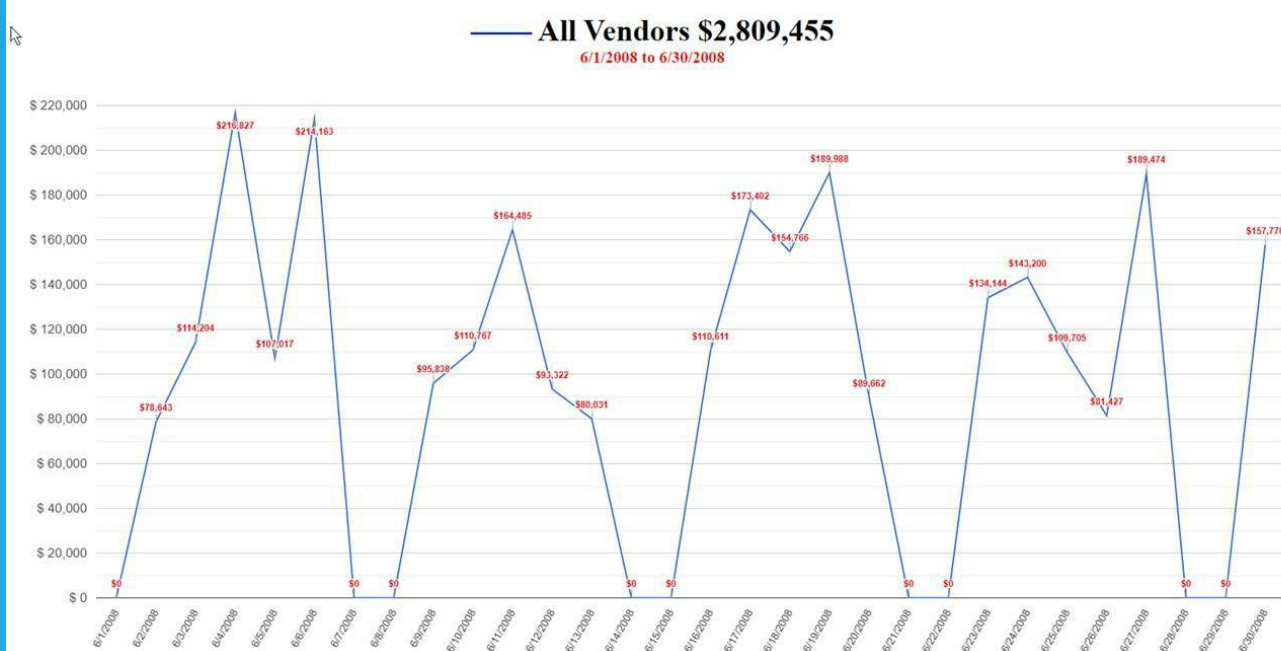

The "Action Item" chart also helps keeps you stay on task and not fall behind.

Productivity = Profitably!

[*click image to expand*](#)

Other charts can be found in the Recent Sales feature. These will break-down Gross Sales Per day, by vendor or all vendors. **See screenshot below.**

Let us know what you think of the new feature - we would love to hear from you!

New Web Site Feature

We now feature a FAQs page on our web site that can be found [here](#).

This page is a work in progress and we will continue to add to it based on the feedback and inquiries we receive from you, our customers. It is simple to navigate and is broken down by module, featuring some common questions that you may have while in the TTS software.

Some examples of the information that can be found:

How do I put a customer on hold....?

[Read more here >>](#)

How do I set up a new vendor?

[Read more here >>](#)

Did You Know?

Please note we are no longer supporting the Internet Explorer (IE) version of the TTS Platform. If you are experiencing any issues Please [contact](#) one of our team members for support.

Don't forget that IRIS Support will be discontinued on August 1, 2020. Please contact our team to transfer your data to Total Order Entry.
